

CARPET & FLOORING

OmnAvia offers the full range of carpets for every possible cabin requirement. From bespoke wool and wool/silk blends to broadloom tufted stylish nylon offerings for the more budget-minded client, OmnAvia brings to you a collection of carpets that deliver a level of sophistication to your aircraft or yacht interior at every level of sophistication. OmnAvia's carpets are luxurious, elegant, and durable, and they all are at surprisingly affordable price points. Our non-textile flooring options range from standard coin-mat coverings to eye-appealing wood grain and stone patterns that add elegance and sophistication to the cabin. Just as importantly, you won't have to wait forever to receive your order. Most broadloom selections ship in two weeks or less, and our custom-designed carpets generally deliver weeks ahead of the competition.

In addition to traditional soft flooring surfaces, OmnAvia stocks a range of non-textile flooring (NTF) options to provide superior performance in those areas of the cabin that are subjected to severe abrasion and exposure to moisture and the elements. With a broad range of patterns and colors that represent traditional patterns to more contemporary wood and stone effects, we can help you create a stunning environment that creates a lasting impression of sophistication.
